EXPERIENCE

Le Wagon - Full-Stack Developer Bootcamp

Montreal, QC

- **Project: CookEazy | Developer**

In a team of four, we created a web application that provides recipes based on available ingredients at home.

Environment: JavaScript | Ruby on Rails | HTML | CSS | AJAX | MySQL

- Optimized the UI of the home page & recipe pages to showcase the functionality of the project.
- Followed the agile SCRUM methodology for developing and delivering features.
- Integrated a 3rd Party API to fetch vegan recipes to our database.

- **Project: BikeEasy | Developer**

Web application AirBnb clone for renting bicycles.

Environment: JavaScript | Ruby on Rails | HTML | CSS | AJAX | MySQL | Figma

- Improved the responsiveness of the web page on mobile and tablet screens.
- Designed the browsing page to showcase rentable bicycles to the user.

Personal Project: Discord Bot | Developer

A social messaging bot that generates random jokes when called with a certain command.

Environment: Python

- Self-taught Python at the same time when creating the bot in a day.
